TRANSFORMING THE CEO

THE VEHICLE RENTAL INDUSTRY IS UNDERGOING A TRANSFORMATION, AND IT IS CRUCIAL FOR BUSINESSES TO EMBRACE A FORWARD-THINKING, INNOVATIVE, AND ADAPTABLE APPROACH TO KEEP UP WITH THE CHANGES.

As the UK's leading technology platform provider and one of the most established rental suppliers in the UK, Nexus delivers unrivalled whole-market access ensuring our customers have the best possible chance of securing their rental requirements whether they are sourcing cars, vans, HGVs, electric vehicles or plant.

Nexus has launched new vehicle rental options that prioritise mobility and flexibility, recognising their importance in today's market – putting you in the driving seat.

PUTTING YOU IN THE DRIVING SEAT

Nexus delivers a partnership approach, combined with the highest levels of service, which in turn provides our customers with a complete vehicle rental solution, leaving them free to focus on their business.

Our award-winning rental management software, IRIS, provides our customers with control over every aspect of their rental needs with the unique ability to source vehicles, plant and machinery anywhere, anytime via the UK's largest rental supply chain.

IRIS provides customers with:

ACCESS TO AN UNRIVALLED, TAILORED SYSTEM

CENTRALISED MANAGEMENT OF ALL RENTAL FUNCTIONS

BENEFIT OF CIRCA 90% OF ALL BOOKINGS MADE WITHOUT ANY HUMAN INTERACTION

COMPREHENSIVE, REAL-TIME MI; SUPPORTED BY OUR IN-HOUSE IT TEAM

BOOKINGS PLACED IN UNDER 30 SECONDS

FULL VISIBILITY AND CONTROL OF RENTAL SPEND

ONLINE CONSOLIDATED ACCESS TO THE UK'S LARGEST SUPPLY CHAIN

NEXUS CONNECT APP PROVIDES USERS LIVE ACCESS TO THEIR RENTAL FLEET

FLEXIBLE & INNOVATION

IN TODAY'S BUSINESS CLIMATE, MOBILITY AND FLEXIBILITY ARE KEY BUSINESS DRIVERS.

Our service offering provides the option for customers to upscale their fleet at peak times or when new contracts land, without the substantial financial commitment involved in purchasing vehicles, which are ultimately depreciating assets.

During the last three years, Nexus has heavily invested in its people and systems to ensure that we are at the forefront when delivering additional services and products; examples of which include:

NEXUS GO 

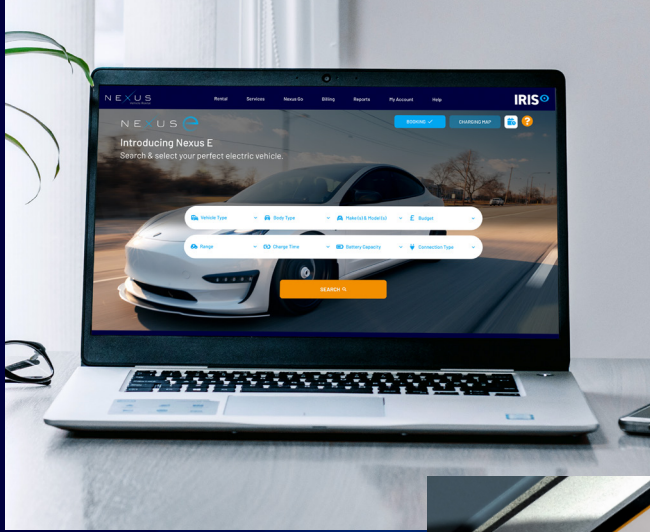

NEXUS GO - TAXI

Provides customers with access to an online taxi booking portal, serviced by over 3,000 companies throughout the UK as well as journey progress and location updates and GPS tracking via Google Maps. This service offers a flexible solution that meets the changing needs of moving people whilst meeting business objectives. Whilst the industry is still dealing with challenges around vehicle supply, this innovative solution ensures that customers can fulfil their travel requirements without the need to take on additional rental vehicles for one-way journeys.

NEXUS GO - RAIL

Customers can access real-time availability, route planning, ticket exchanges, refunds and lowest-cost options for their required journey. The product offers the same USPs as the Nexus Go Taxi service with consolidated billing, authorisation controls, customer MI & real-time passenger service tracking.

Giving our customers access to a vast fleet of EVs and PHEVs with flexible mileage options and the ability to search for a vehicle by range, battery capacity, charge time and connectivity type. Included as part of Nexus E, is our market leading Contactless EV Charging Service. This enables customers to plan journeys, locate charge points and check charge point availability. When the customer arrives at the charge point, they are then able to start, monitor and stop the vehicle charge. The entire process is contactless, all controlled via IRIS, invoiced on account, with no requirement for EV charge cards.

This unique and innovative mobile application enables customers to manage all aspects of their rental vehicle lifecycle. It provides users with a live portal to their rental fleet and connects customers, Nexus and suppliers in one technological universe for all Nexus Vehicle Rental bookings.

INNOVATION

NEXUS CHOICE

A flexible rental offering for 90+ day hires, this service provides a long-term, adaptable rental solution where our customers can select the make and model of car, van, hybrid, or electric vehicle they require, with the ability to off-hire when it is no longer needed.

MULTI-ALLOCATION FUNCTION

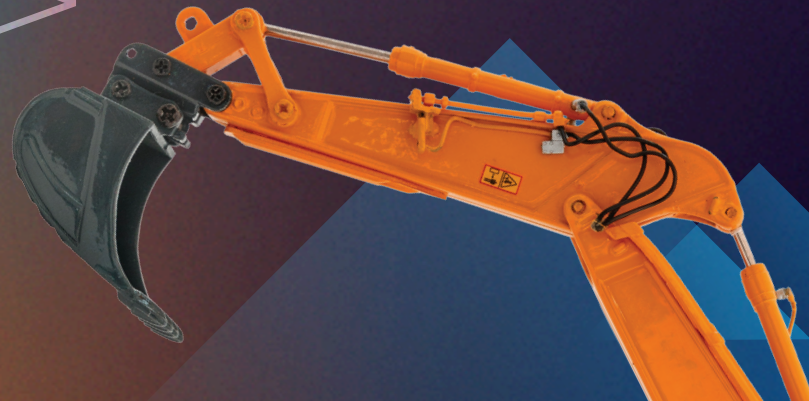

IRIS has recently been developed to provide our customers with the ability to advise, at the point of booking, other vehicle types/sizes that would be acceptable should the preferred group not be available which in turn saves time and enables our customers to focus on other priorities.

SINCE ITS LAUNCH, OUR CUSTOMERS HAVE SEEN BOOKING CONFIRMATIONS INCREASE BY 25%
