

Plant, Equipment & HGV Hire.

Managed by Nexus.
Powered by Iris®.

One Platform.
One Team.
Every Supplier.

You are losing
£50 – £75
every hire.

“Most businesses don’t see this cost because it’s buried in procurement and operations overhead. But it’s real. And it quickly adds up.”

We can fix that.

Every piece of Plant, Equipment & HGV you hire costs not just money, but time.

Time spent...

- Fines administration.
- Accessing and managing supplier portals.
- Coordinating deliveries across multiple providers.
- Chasing and filing compliance certificates.
- Processing and reconciling invoices.
- Tracking and authorising payments.
- Manual reporting and spreadsheets.
- Completing admin for off-hire and proof of collection.
- Managing assets that go off-road.
- Asset sourcing and fulfilment.
- Arranging servicing and managing breakdowns.
- Chasing suppliers and managing escalations.
- Damage claims and queries.
- Ensuring every hire is fit for purpose from day one.

It all adds up.

- An average of over 2 hours of work for your team.
- £50-£75 of administrative overhead. Per hire. Every time.
- Multiply that cost across hundreds of hires per year.

Now imagine eliminating it entirely.

Meet iris: The Intelligence Behind Your Plant, Equipment & HGV Operations.

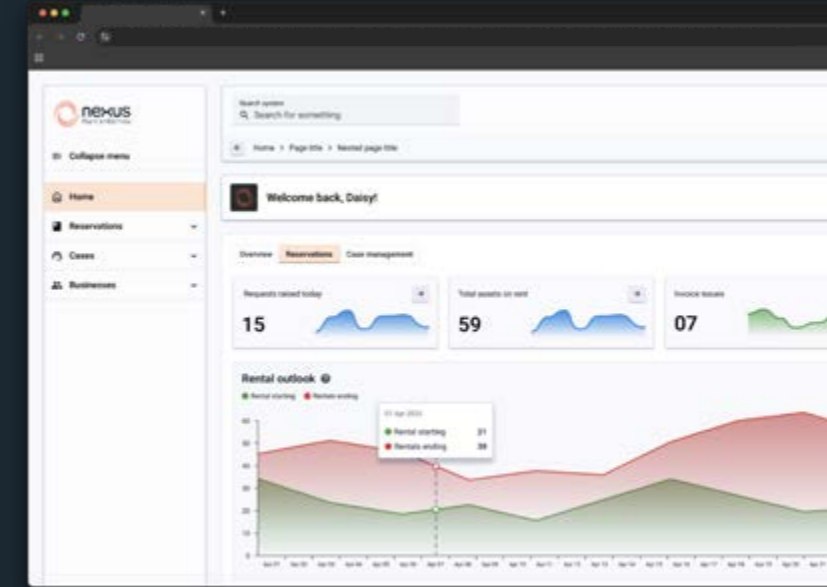

Most platforms give you tools to manage suppliers yourself. Iris® is different. It's the system we use to manage suppliers for you. Iris® is our purpose-built platform that manages the complexity of multi-supplier Plant, Equipment & HGV hire on your behalf. You get the visibility and control. We handle the coordination.

Platform capabilities.

1. Hire Management Module.

The complete lifecycle of every Plant, Equipment & HGV hire, in one place.

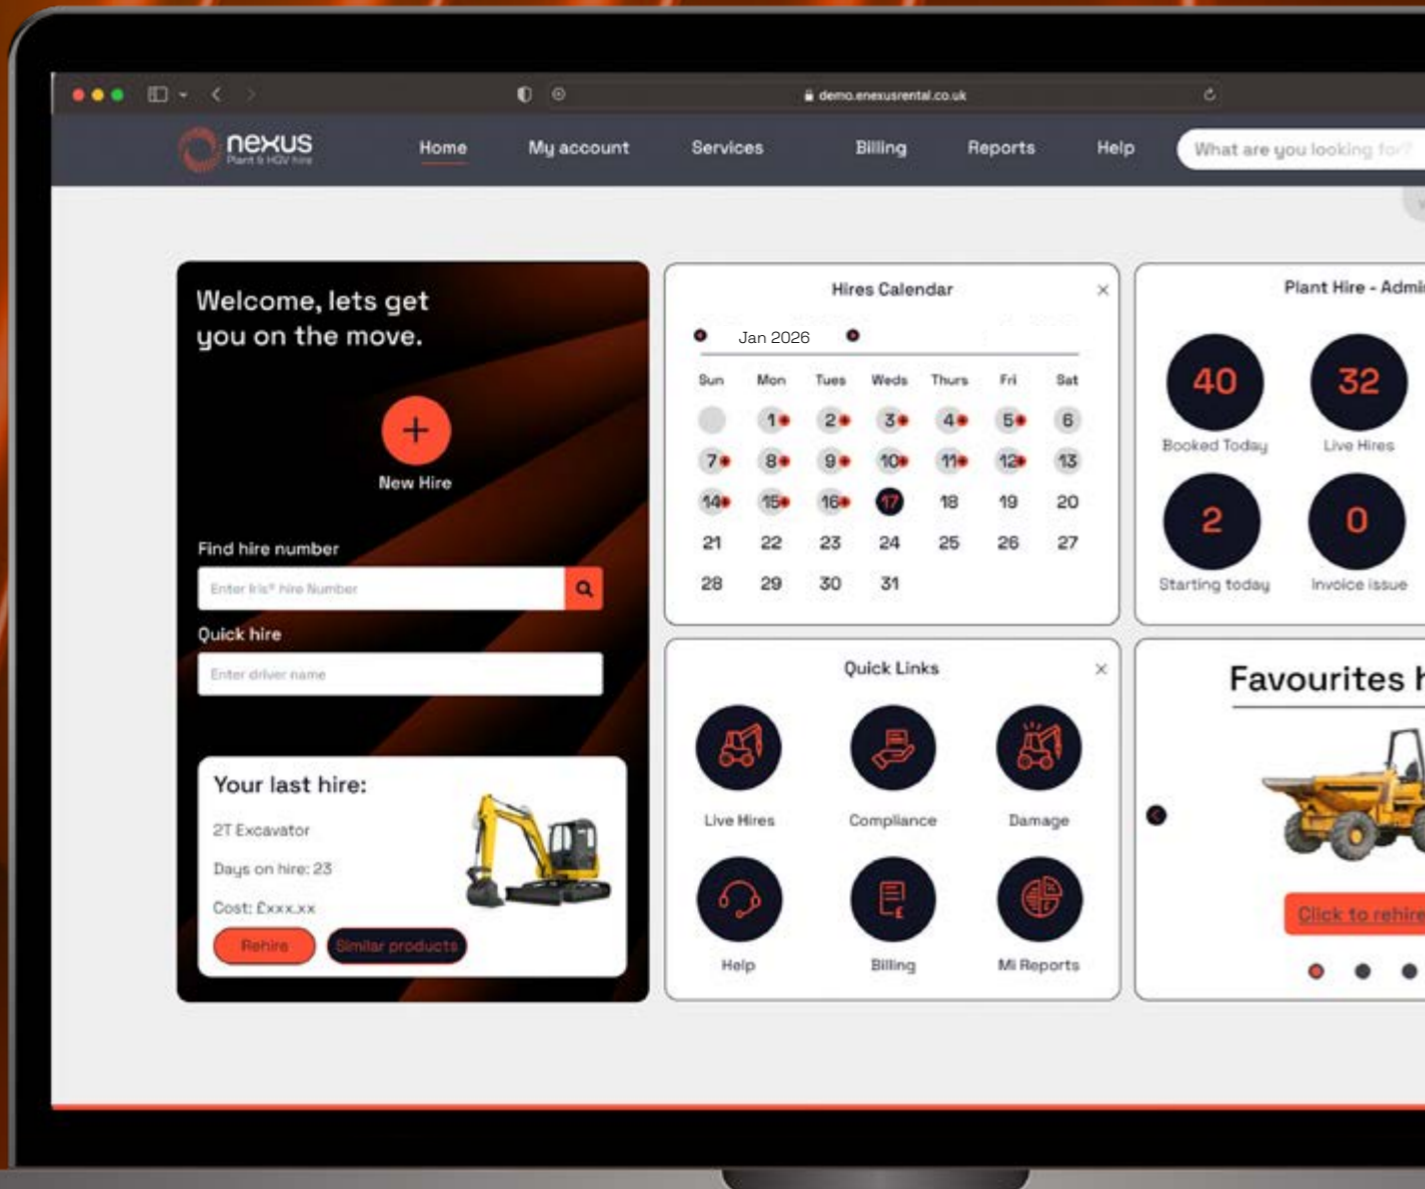

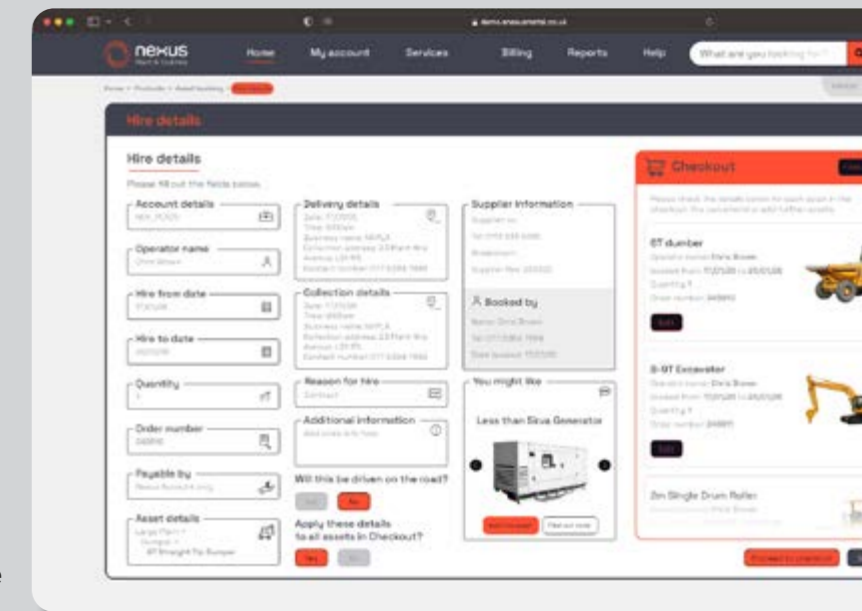

- End-to-end hire booking management.
- Configurable approval workflows.
- Extend, amend, cancel, or off-hire at the touch of a button.
- Automated off-hire alerts and hire extension toolkits.
- Real-time tracking across all sites and suppliers.
- What3Words integration for pinpoint delivery and collection accuracy across every hire.

2. Bespoke Account Configuration.

Your business rules, built into the platform.

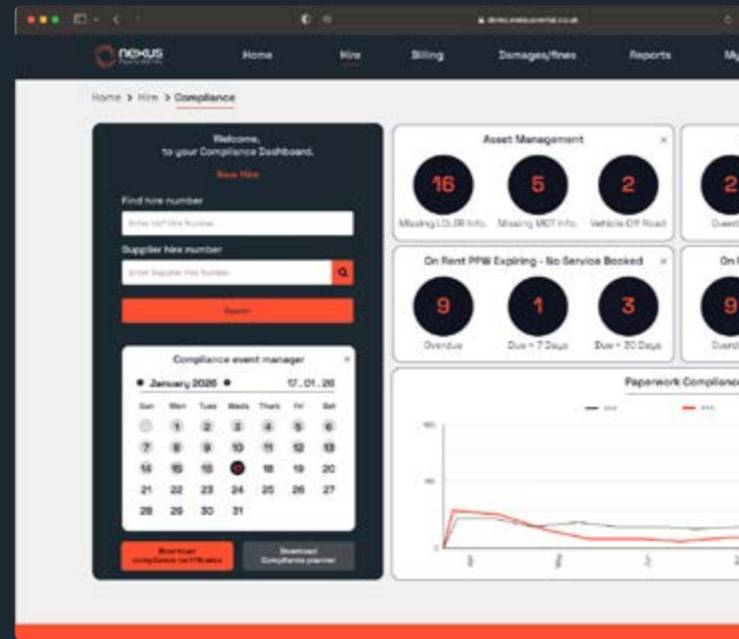

- Custom validations for cost centres, job numbers, order numbers.
- Bespoke data fields for your specific requirements.
- Advanced management reporting.
- Ability to upload and assign employee or operator profiles to hire bookings.

3. Compliance Management Dashboard.

Self-serve, real-time compliance and servicing dashboard.

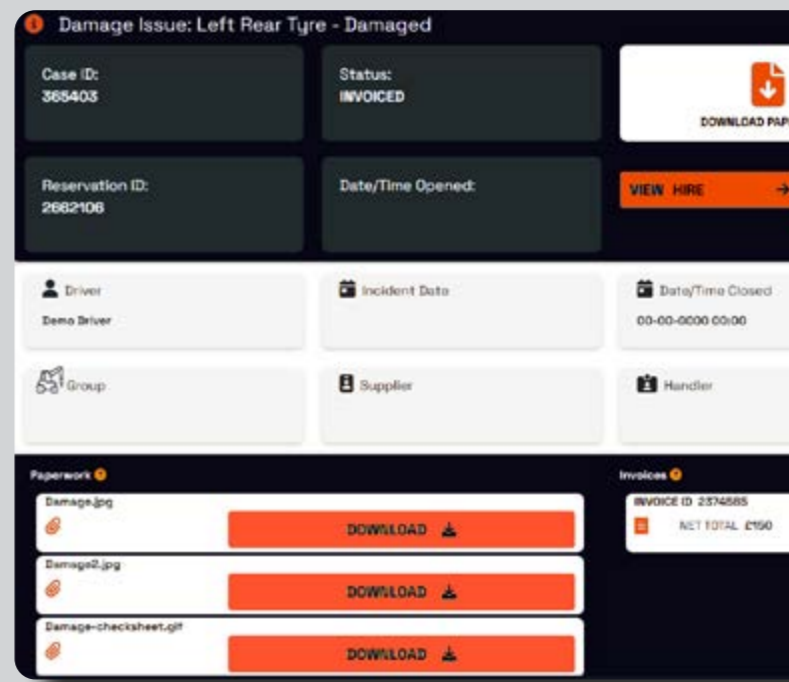

- Live tracking covering LOLER, LBT, PMI, MOTs, servicing and more.
- Event reporting for every compliance activity.
- All compliance and service records pre-validated, digitised, and downloadable.
- Service and inspection planners supported by proactive reminders.
- Off-road and breakdown management module.
- Audit-ready records with full digital trail.

4. Fines Management.

Digitised solution for all fines, offences and prosecutions.

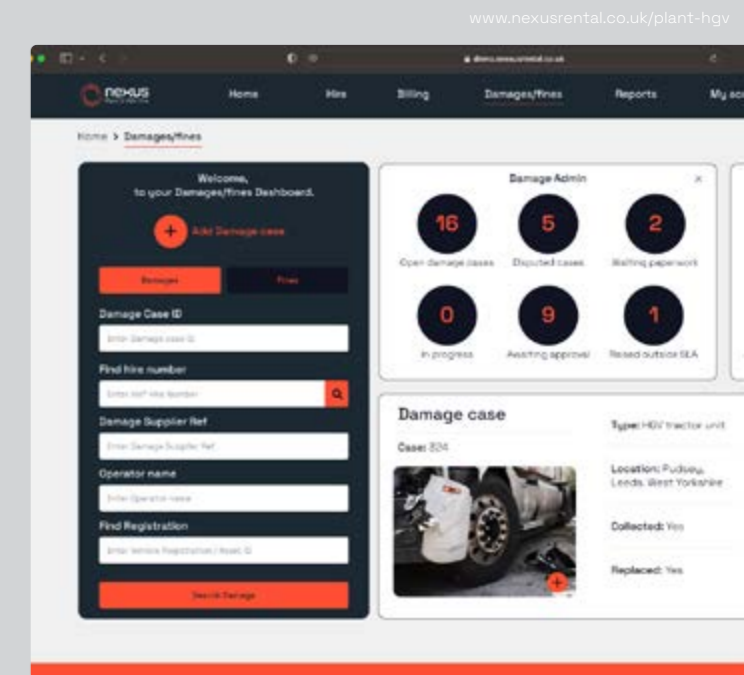

- Fines management module.
- End-to-end management of fixed penalties and prosecutions.
- Driver, operator, vehicle, and hire-level attribution.
- Supporting documentation captured, validated, and stored digitally.
- Management reporting on repeat offences and offenders by source.

5. Damage Claims Workflow.

End-to-end damage management system from first notification through to invoicing.

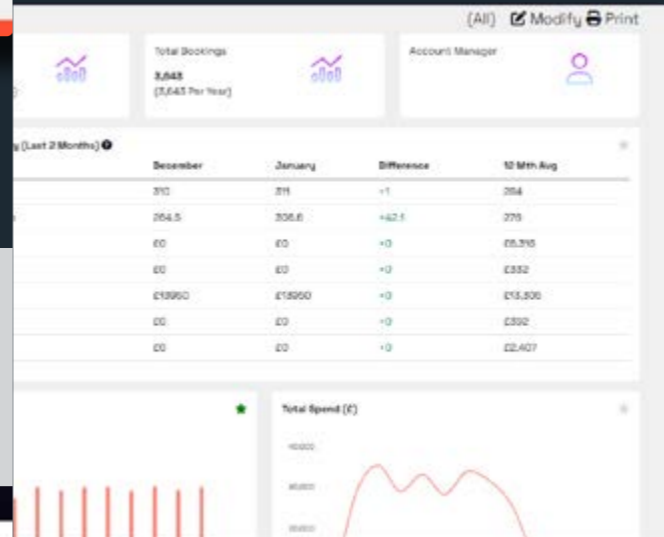

- Pre-validated, digital, downloadable engineer and assessor reports.
- Every claim supported by delivery and collection inspection sheets clearly sign-posting chargeable damage.
- Costs validated against supplier service level agreements.
- We challenge overcharging and inaccuracies on your behalf.

6. Advanced Self-Serve Reporting.

Transform hire data into boardroom intelligence.

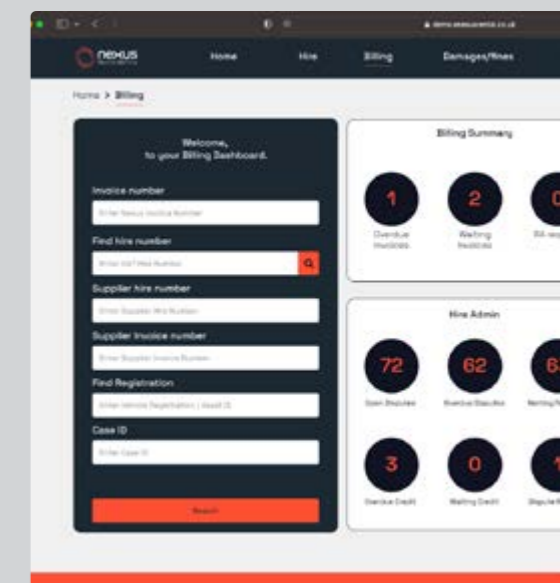

- Real-time management reporting on hire usage, costs, and trends.
- Full visibility of categorised spend.
- Drill down from organisation-level to individual hires.
- Pre-built and custom reports.
- Scheduled distribution.

7. Centralised Invoice Processing.

One invoice. Complete transparency. Automated validation.

- All supplier invoices consolidated monthly.
- All invoices checked on your behalf before you see them.
- End-to-end invoice dispute management system.
- Reduces discrepancies and overcharging risk.
- Full cost visibility across queries, billed and unbilled hires, and paid and unpaid invoices.

More than a platform.

Most systems give you tools but then leave you to manage the complexity.

You get a portal and a few dashboards, but you're still coordinating suppliers, chasing compliance, validating invoices, and dealing with damage and fines.

iris is different. It's the platform that works for you.

iris®

Complete visibility, control, transparency, reduced admin, and more time to focus on what matters.

Plant, Equipment & HGV Management

Supplier coordination, compliance management, invoice validation, damage claims, and fines administration, all managed end to end from our dedicated hire desk.

Need a supplier not on our panel?

Not a problem. Our Supply Chain team can onboard them into the network on your behalf.

One Platform | One Team | Every Supplier.

Assurance for Transport Managers.

Your O Licence is your responsibility. A missed PMI, an overdue tachograph calibration, or a laden brake test that cannot be evidenced is not just an operational problem. It is a risk to your licence.

Iris® keeps you ahead.

Every compliance event across your hired HGV fleet tracked in one place. MOTs, PMIs, tachograph calibrations, laden brake tests, and LOLER certifications all digitised, pre-validated, and available on demand. Proactive alerts at 30, 7 and 3 days before expiry. Audit-ready records at a click.

Organised compliance.

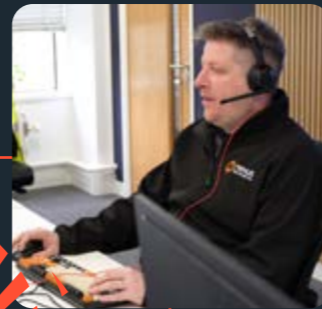

Compliance planners configurable by category, giving you a forward view of every upcoming inspection across your fleet. No surprises. No missed deadlines. No risk to your licence.

Complete coverage across five categories.

Most construction and infrastructure sites don't hire from just one category. They need Plant, Equipment, HGVs, welfare units, access solutions, and specialist vehicles.

Without Nexus, that means managing several or more different suppliers, multiple portals, separate compliance processes, and a stack of invoices. Complexity builds quickly, visibility disappears, and costs creep in.

With Nexus, everything comes together in one place.

↑ Book an Iris® demo here ↑

HGV & Specialist Fleets.

Heavy Goods Vehicles and specialist transport for logistics, construction, and operations.

- Rigid vehicles (5t to 26t).
- Articulated vehicles (tractor units and trailers).
- Specialist (low loaders, tankers, refuse collection, traffic management vehicles, mobile cranes).
- Light commercial vehicles (vans, Lutons, tippers).

Service Standards*

HGV Service Standard | 24/7 breakdown support | VOR attendance within 120 minutes | Average HGV VOR under 5 days | 95%+ MOT pass rate | Compliance paperwork provided upon delivery | Damage notifications within 5 days from end of hire | Fines processed, validated and available via Iris® within 5 days

Material Handling.

Equipment for lifting and moving materials across warehouses, sites, and facilities.

- Forklift trucks (counterbalance, reach, rough terrain).
- Warehouse equipment (pallet trucks, stackers, order pickers).
- Telehandlers (compact to heavy-duty, rotating, specialist attachments).
- Specialist lifting equipment.

Service Standards*

LOLER compliance tracking and alerts | PDI documentation and regulatory certifications available on demand | Fast quotes, rapid deliveries, and prompt collections

Site & Ground Works.

Heavy plant and machinery for earthmoving, excavation, demolition, and groundworks.

- Excavators (mini to large, including long-reach).
- Loading equipment (skid steer, tracked loaders, wheeled loaders).
- Ground preparation (bulldozers, graders, compaction equipment).
- Demolition, breaking equipment and wackers.
- Site transport (dumpers, tracked dumpers, site vehicles).

Service Standards*

Pre-delivery inspection docs | Manage bookings instantly via Iris® | PMIs tracked, with paperwork validated and available digitally | Delivery and collection docs accessible via Iris® | All suppliers regularly audited for quality, health, safety, and environmental accreditations.

Site Setup & Welfare.

Welfare facilities, site accommodation, temporary infrastructure, and site services.

- Welfare units (welfare vehicles, portable toilets, welfare cabins, disabled access, anti-vandal).
- Site accommodation (offices, cabins, meeting rooms, canteens).
- Temporary infrastructure (fencing, barriers, scaffolding, lighting, generators).
- Site services (water and fuel bowzers, waste management, fuel storage, CCTV).

Service Standards*

Delivery and collection with flexible hire options | Invoices checked and disputes resolved on your behalf | Full spend visibility, measured against customer-specific KPIs | Specialist Hire Desk support for every stage of your site setup.

Access Equipment.

Powered access platforms, scaffolding, ladders, and height access solutions.

- Mobile Elevated Work Platforms (scissor lifts, boom lifts, spider lifts).
- Specialist access (vehicle-mounted, tracked, mast lifts, atrium lifts).
- Scaffolding and towers (mobile towers, stairway towers, edge protection).
- Ladders and steps (extension ladders, platform steps, roof ladders).

Service Standards*

LOLER certifications provided on delivery and available digitally on demand via Iris® | Breakdown response within 4 hours; repair or replacement within 24 hours | Quality control audit checks completed on every delivery | Monthly reporting with operational and commercial optimisation insights.

Responsible business.

It runs through everything we do. At Nexus, responsible business is not a separate agenda. Powered by technology and delivered by our people, we collaborate closely with customers and suppliers to reduce environmental impact, support green targets, and boost employee engagement.

Empowering people.

Helping you to meet your goals

When you partner with Nexus, our responsible business commitments become an extension of yours. We give you the data, the tools, and the expertise to make measurable progress.

Tech-led change.

Visibility across your entire hire operation

Iris® holds extensive emissions data built across years of managing complex, multi-supplier operations. At a click, customers can access data across their entire hire estate.

Driving impact.

What Iris® puts at your fingertips:

- Emissions data by asset type, fuel category, supplier, hire duration and site.
- Pre-configured green preferences set at the point of order.
- Equipment specifications, fuel types and environmental impact data in one report.
- All the intelligence needed to inform, benchmark and improve.

Inspiring Partnerships.

Expert guidance that transforms data into progress

Our Account Management team sits alongside customers to interpret the data, identify opportunities, and translate insight into action, aligned with their green targets. We don't just report the numbers. We help you drive change.

Awarded the EcoVadis Bronze Medal, placing **Nexus in the top 35%** of companies assessed globally for responsible business practice.

Committed to responsible supply

Every supplier in our network completes quality, health, safety and environmental documentation, and provides evidence that they have practices and policies in place to manage quality, reliability, safety, responsibility and ethical standards. We hold this information on record as part of our ongoing Supplier Risk Management Assessment, including:

- Safety accreditations and ISO certifications.
- Anti-bribery and modern slavery policies.
- Enforcement notices.
- Environmental practices.
- Environmental breaches.
- Quality management.
- Health & Safety policy.
- Cyber security.
- Carbon reduction.
- Fraud prevention.

Our dedicated Supply Chain team works with suppliers to improve their policies and processes where relevant. We actively favour suppliers who share our values, particularly those investing in apprenticeship schemes, local employment and community contribution. Suppliers are encouraged to invest in Stage V engines, hybrid technology and electric equipment.

Electric Plant & Equipment

Ideal for urban sites and Clean Air Zones.

- Telehandlers
- Forklifts
- Access Platforms

HVO & Hybrid HGV

Low-carbon alternatives across the truck fleet.

- HVO-compatible trucks
- Hybrid truck options

Solar-powered Welfare & Site Setup

Reducing generator dependency and on-site fuel consumption.

- Solar Welfare Units
- Solar Hybrid Generators
- Battery Storage Units
- CCTV & Lighting Towers

Zero-emission MEWPs

Hybrid and zero-emission access platforms.

- Hybrid access platforms
- Zero-emission MEWPs across the full range

125+ Suppliers.
650+ Branches.
700,000+ Assets.

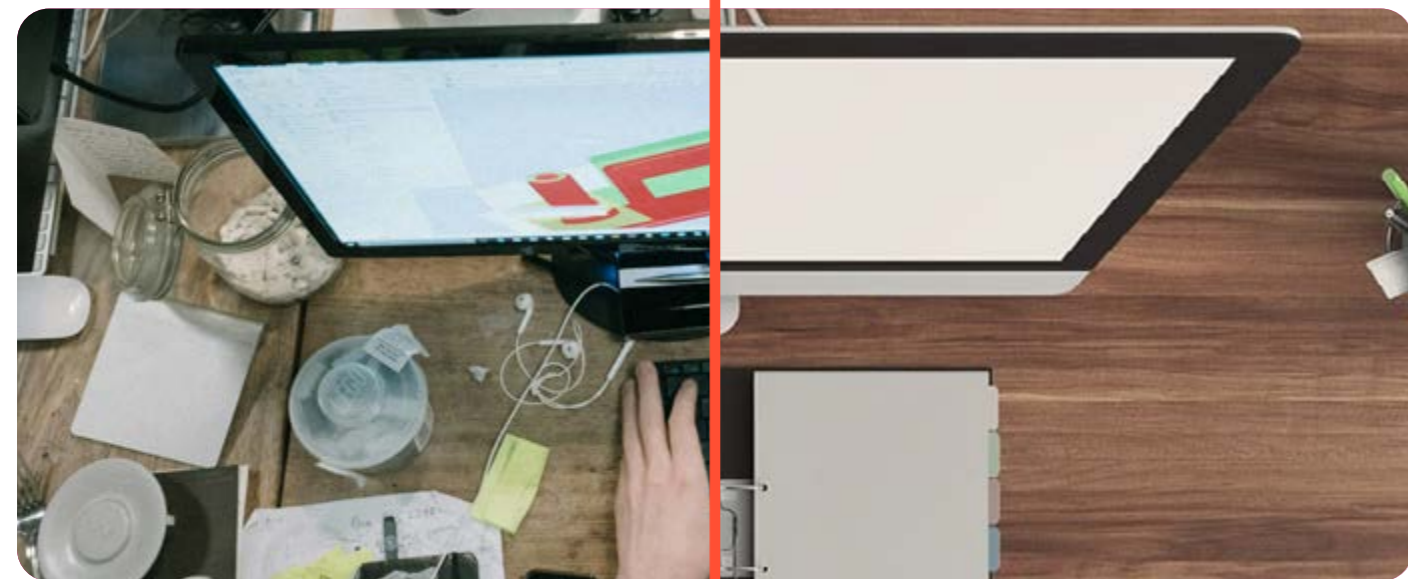

01.

Simplicity from complexity.

Access All Suppliers. Manage One Relationship.

Plant, Equipment & HGV hire shouldn't require an entire department to manage.

We take the chaos of multiple suppliers: different portals, different invoices, different processes, different compliance systems, and turn it into one platform, one team, every supplier.

What this means for you:

- **Our Hire Desk.**
Access to a dedicated team of trained Plant, Equipment & HGV experts. Handling all the legwork on your behalf.
- **One Platform.**
Request hires through Iris® or our live hire desk, with all bookings managed through a single platform and coordinated across our supplier network.
- **One Invoice.**
All suppliers rolled into one monthly invoice with clear line-item visibility, no reconciliation headaches.
- **Framework Pricing.**
Negotiated rates across the network ensure consistent terms and cost assurance.
- **Fixed-Rate Tariffs.**
No surprises. No budget creep. Full cost control.
- **One Team Managing Everything.**
We manage delivery, compliance, invoicing, damage claims, servicing, supplier coordination and escalations, giving you one point of contact and less complexity.

02.

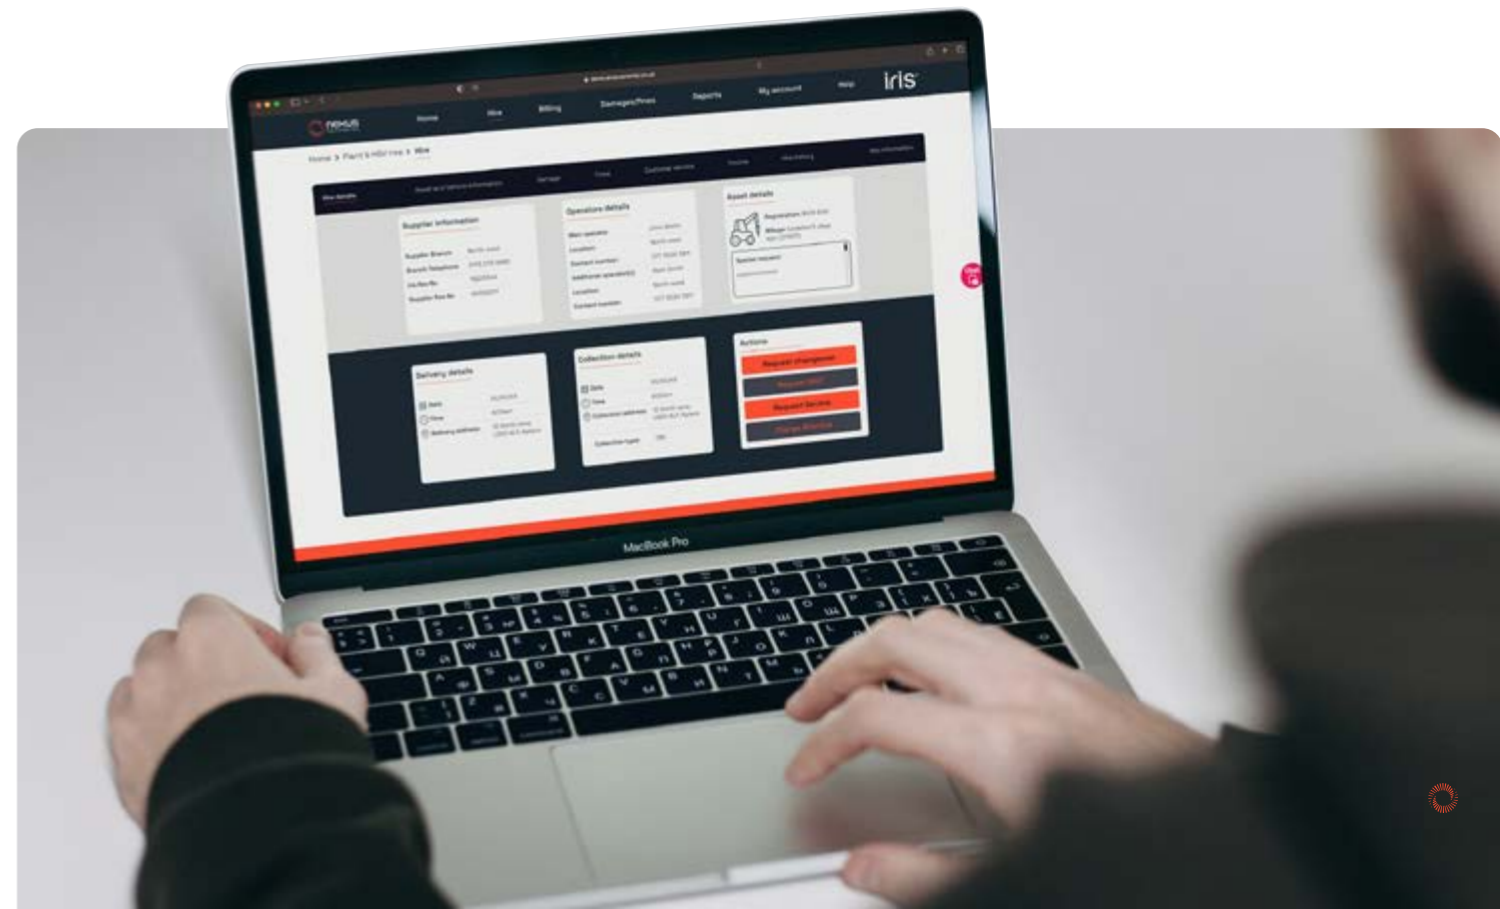

Visibility is power.

See Everything. Control Everything. Optimise Everything.

Today, Plant, Equipment & HGV hire operates in the shadows: fragmented suppliers, limited visibility, rising costs. You can't manage what you can't see. For most businesses, Plant, Equipment & HGV hire remains a black box: budget goes in, invoices come out, and everything in between is unclear. Nexus turns on the lights, bringing total visibility, control, and confidence.

What you get:

- **Complete Real-Time Visibility.**
A live dashboard showing all assets on hire across every site and supplier, with costs in real time.
- **Automated Off-Hire Alerts.**
We flag unused equipment ready for return, cutting unnecessary hire days.
- **Consolidated Spend Reporting.**
Real-time management reporting and spend analysis across your entire Plant, Equipment & HGV operation giving you a single source of truth.
- **Compliance Without Chasing.**
Live compliance dashboard tracking LOLER, LBT, PMI, MOT, servicing and more. Certificates digitised and downloadable, with expiry reminders.
- **Fines & Damage Management.**
Digital audit trails for fines and structured damage claims, validated against SLAs – no overcharging.

03.

Expertise meets technology.

Real people managing intelligent systems.

Most hire platforms are either pure tech (no human support) or pure service (no technology backbone). **Nexus is both.**

The Iris® Difference: Intelligence, not just software.

Our industry-leading tech platform, allowing you to focus on the important stuff.

- Hire booking module with customisable approval workflows and customer-specific account configuration.
- End-to-end tracking across all suppliers.
- Advanced compliance management module covering LOLER, LBT, PMI, MOT and servicing.
- Structured damage claims workflow with cost validation.
- Fines management with full digital audit trail.
- Centralised invoice processing with pre-validation and dispute management toolkits.
- Management reporting hub covering utilisation, costs, trends, compliance, health and safety.

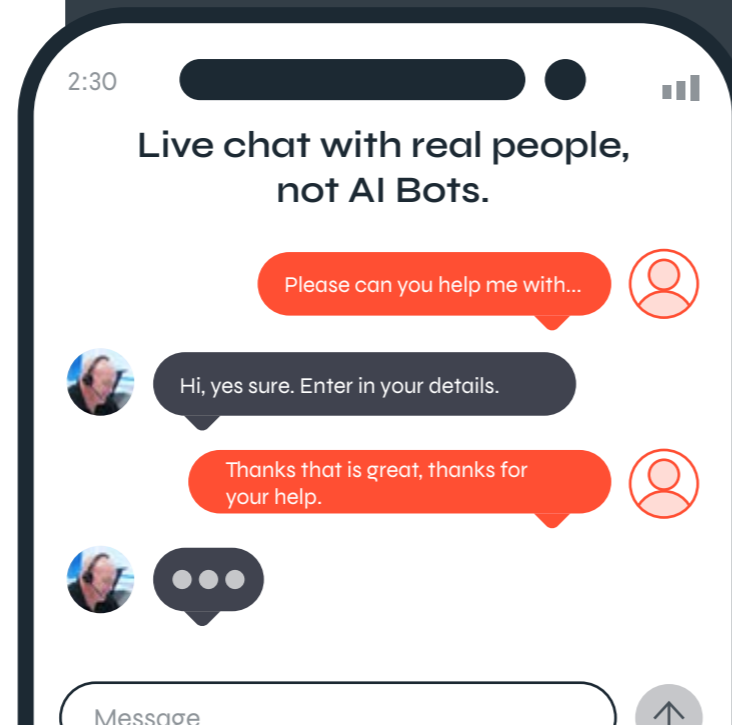

The Live Hire Desk: Industry experts, not order-takers.

The Nexus Live Hire Desk is much more than a booking service; it's our UK-based team of Plant, Equipment & HGV hire experts providing real operational support via live chat, phone, and email.

We deliver fixed-price or bespoke quotes on demand, with hire durations from 1 day upwards.

Every hire is backed by pre-delivery inspections, proof of delivery and collection documentation, and regular reporting on activity, spend, compliance, damage, fines, and KPIs.

We work with customers to understand use and application requirements, agreeing and sourcing the right equipment, in the right place, at the right time, fit for purpose and fully health and safety compliant.

2:30

04.

Scale without sacrifice.

Access to Everything. Choice in Everything.

Consolidation usually means less choice. Not with Nexus. Our supplier network gives you access to more equipment than a single supplier could offer: 700,000+ vehicles and assets across 125+ accredited suppliers, all through one platform.

You get the efficiency of consolidation with the flexibility of a multi-supplier strategy.

Supplier governance:

All suppliers accredited and performance-managed:

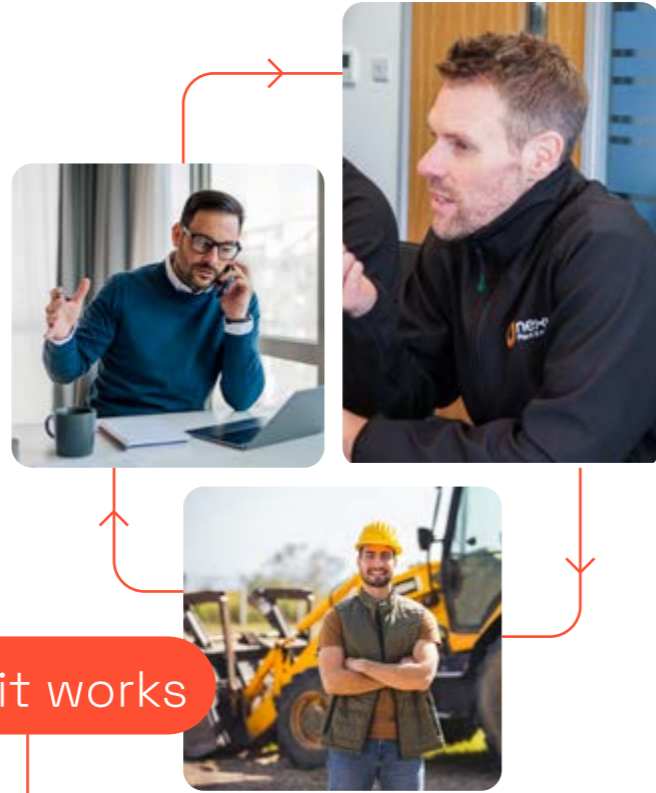

- Signed up to SLA commitments.
- Managed against KPI frameworks.
- Quality, Health, Safety and Environmental standards enforced.
- Tech-led supplier performance management.
- Scorecard systems tracking all touchpoints across the hire lifecycle.

A partnership that gives you choice:

We partner with a diverse network of major national suppliers, specialist providers, local independents, and regional experts across the UK, giving you the freedom to choose the right supplier for every job without contract restrictions. Whether you need a specialist piece of equipment, want access to a specific regional provider, or rely on a trusted local supplier, Nexus will source and coordinate it seamlessly alongside our wider network.

What Nexus does.

How it works

Nexus is the UK's smarter way to control your Plant, Equipment & HGV Hire.

Through Iris®, we manage Plant, Equipment & HGV hire across all your existing suppliers, consolidating fragmented processes into a single system. Your operations scale. Your admin overhead doesn't.

You work with us.

One Platform. One Team. Every Supplier. One point of contact for all Plant, Equipment & HGV hire across your entire operation.

We work with the market.

We coordinate with 125+ accredited suppliers across 650+ UK branches on your behalf, giving you access to around 700,000+ vehicles and assets nationwide.

Integrate your suppliers.

Need a supplier not on our panel? Not a problem. Our Supply Chain team can onboard them into the network on your behalf.

You get complete visibility and control.

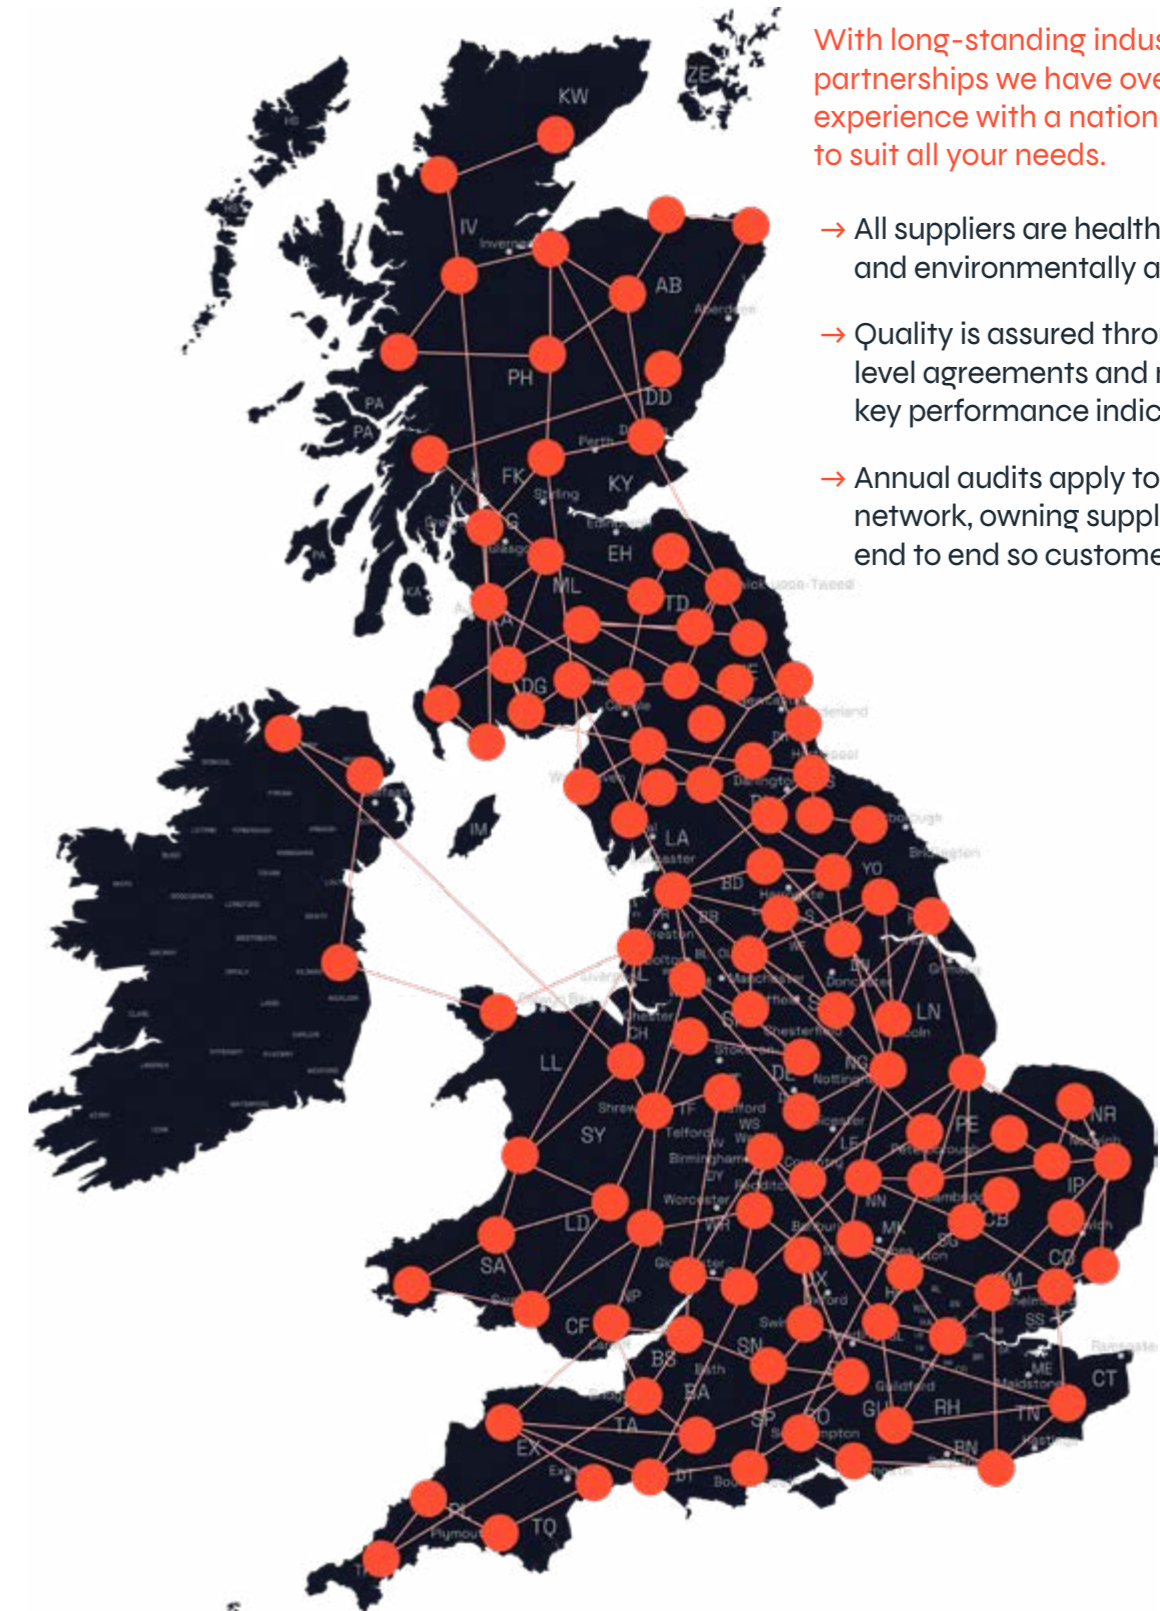

Real-time dashboards. Automated compliance tracking. Consolidated invoicing. Advanced reporting. All the intelligence you need.

We handle all the complexity.

Every booking coordinated. Every invoice consolidated. Every compliance certificate tracked. Every supplier managed on your behalf.

Our supply.

A network that scales like a national supplier and behaves like a local one.

With long-standing industry-built partnerships we have over 25 years experience with a national supply to suit all your needs.

→ All suppliers are health, safety, and environmentally accredited.

→ Quality is assured through robust service level agreements and measurable key performance indicators.

→ Annual audits apply to our entire supplier network, owning supplier compliance end to end so customers don't have to.

**Stop managing
suppliers. Start
focusing on
what matters.**

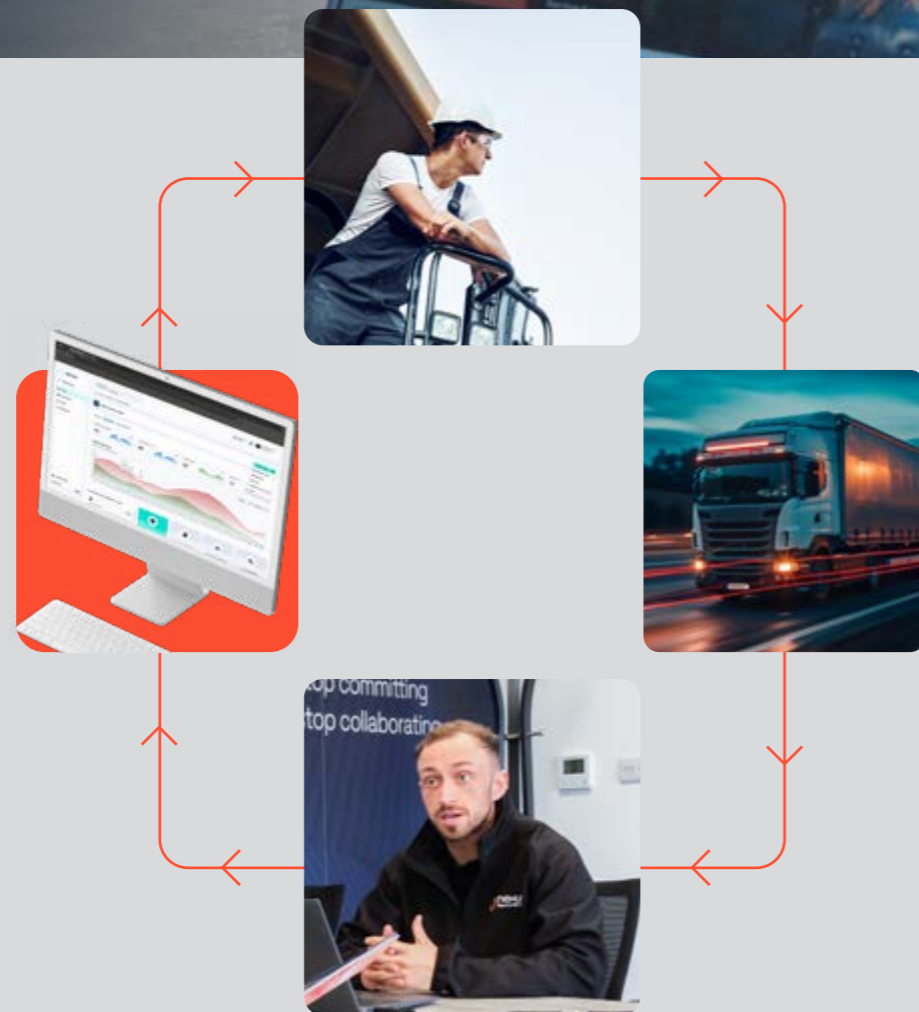

Built on 25 years of hire expertise.

We didn't build Nexus Plant, Equipment & HGV overnight. We built it from 25 years of solving hire complexity for businesses across the UK.

We started with cars and LCVs, learning how to consolidate fragmented supplier relationships into clear, workable systems. No grand announcements. No promises to transform everything overnight. Just consistent, practical improvements to how businesses book, manage, and understand their hire operations.

When we turned our attention to Plant, Equipment & HGV hire, the same challenges were immediately clear. Businesses juggling several suppliers. Spreadsheets stretched beyond their limits. Compliance documents buried in inboxes. Equipment left idle on site simply because no one knew it was there.

So, we applied the same proven model to Plant, Equipment & HGV hire, giving customers a clearer, more controlled way to manage complex hire at scale.

Our network.

125+

Supply Partners.

All managed against
SLA and KPI frameworks.

650+

Branches Nationwide.

Complete UK coverage,
local availability.

700,000+

Vehicles and Assets.

Access to more equipment than
a single supplier could offer.

Your Plant, Equipment & HGV Hire. Our Intelligence.

Let's talk about reducing your admin costs.

Whether you're managing 50 hires a year or 5,000, the complexity is the same. Multiple suppliers. Fragmented processes. Hidden overhead.

We turn that complexity into a single platform, a single invoice, and a single point of contact.

Schedule a demonstration of Iris® and discover what complete visibility and zero overhead looks like for your operation.

The Iris® Platform.

ISO 27001 Certified
Information security management.

GDPR Compliant
Data protection built-in.

99.9% Uptime SLA
Built for business continuity.

24/7 Monitoring
Issues resolved fast.

The Hire Desk.

- Plant, Equipment & HGV sourcing managed on your behalf.
- Delivery and collection audit checks completed for you.
- Damage, fines, compliance, and escalations handled end to end.
- Fully managed servicing and compliance.
- Invoices pre-checked, validated, and challenged where required.
- All underpinned by full visibility and control through Iris®.
- An understanding of use and application to ensure every hire is fit for purpose.

The industry leading platform.

It is only a demo away.

We're the intelligence layer between you and the market.

We work **WITH** your suppliers, not against them.

We combine human expertise with platform power.

We consolidate Plant, Equipment & HGV hire in one platform.

Your Plant, Equipment & HGV hire. Our coordination. **Complete control.**

Why Nexus?

**Intelligence
beats
fragmentation.**

**Our network,
technology and service
are built to keep
your operation running
when it matters most.**

Without Nexus:

- X You manage relationships with multiple suppliers.
- X Different contracts, different processes, different invoices.
- X Your team spends hours coordinating.
- X Compliance and servicing events missed, with certifications manually chased.
- X Invoice reconciliation takes days.
- X Visibility is reactive: you see costs when invoices arrive.
- X Fines and damage claims handled individually across multiple suppliers.
- X No consolidated reporting or trend analysis.

With Nexus + iris®:

- Right kit, right place, right time - sourced by experts who understand your operation.
- We coordinate with all of your suppliers behind the scenes.
- One login, one invoice, one team, one point of contact.
- Dedicated Hire Desk to manage the detail and coordination on your behalf.
- £50-£75 administrative overhead eliminated per hire.
- Full compliance management solution.
- Fines and damage managed on your behalf with cost validation.
- Real-time management reporting across your entire operation.

“Your team should be focused on what matters. We handle everything else.”

The intelligent consolidation layer that transforms equipment hire complexity into operational simplicity.

The Nexus value.

- Admin overhead eliminated.
- One Platform. One Team. Every Supplier.
- Nationwide supply, fully governed.
- Live Plant, Equipment & HGV experts owning the detail.
- Full compliance and servicing management.
- Damage and fines handled end to end.
- Pre-validated billing and dispute control.
- Real-time visibility and management reporting.
- Dedicated team of hire desk specialists.
- Right kit, right place, right time, sourced fast.

The bottom line.

- We remove the admin.
- We manage the suppliers.
- We own compliance, damage, fines, and billing.
- You get total visibility and control.
- Delivered by Iris®, backed by real Plant, Equipment & HGV experts.
